Karlstein, 27.10.2025

BMZ GERMANY GMBH RECOGNIZED AS ONE OF GERMANY'S LEADING COMPANIES

BMZ Germany GmbH, based in Karlstein am Main, is delighted to have achieved an outstanding position in the latest company ranking by Die Deutsche Wirtschaft ("DDW"): With a ranking index of 416 points, the company achieved 1000th place in the overall ranking among more than 35,000 qualified companies in Germany.

BMZ Germany GmbH is also one of the most important medium-sized companies, achieving 237th place out of 10,000.

"We are proud of this award. It confirms our position as an innovation and technology leader in the field of lithium-ion systems and underlines our commitment to quality, sustainability, and growth" explains Sven Bauer, founder and CEO of the BMZ Group.

Significance of the award

The placement in the DDW ranking highlights four key aspects in particular:

- Growth and competitiveness – The rating is based on a scoring index of 39 criteria, which includes market relevance, innovative strength, sustainability, and employee development.
- SME profile – As a medium-sized company, BMZ consistently demonstrates how German technology and production expertise remains globally competitive.
- Relevance for the future – In the ranking of "trend and future markets," BMZ is listed in the areas of robotics & automation, alternative drives, raw materials, and recycling management.
- Trust for stakeholders – Customers, suppliers, employees, and investors can rely on an excellently listed company with a stable market position.

Outlook

BMZ Germany GmbH remains ambitious for the coming year: the focus will be on continuing international expansion, investing in research and development, and consistently focusing on sustainable and reliable energy system solutions. In combination with today's award, the company will reinforce its message: "We don't just supply batteries – we are helping to shape the energy transition."

We would like to thank all our employees, partners, and customers who have made this success possible.

About the DDW rankings

The information network Die Deutsche Wirtschaft uses the DDW scoring system to identify Germany's leading companies based on a wide range of criteria. The award is considered an established benchmark for economic strength, innovative power, and sustainability. Bus manufacturer Alexander Dennis, a global leader in the double-deck bus segment and a subsidiary of bus and coach mobility solutions provider NFI Group Inc., has entered into a strategic partnership with German battery manufacturer BMZ Group to support the deployment of zero-emission double-deck buses in North America, starting in 2026.
