

PRESS RELEASE

BMZ GROUP TO EXHIBIT AT AGRITECHNICA

Karlstein am Main, Germany, November 2nd, 2023 – BMZ Group, a global specialist in lithium-ion batteries, is pleased to announce its participation as an exhibitor at AGRITECHNICA. The world's leading trade fair for agricultural technology will take place from November 12th to 18th, 2023 at the Hannover Exhibition Center. BMZ can be found in the Systems & Components area in Hall 15 at booth H29 and will present innovative concepts for the electrification of agricultural machinery as well as POWER2GO, a portable electric energy storage system.

It is not only the ever more stringent environmental protection regulations, both nationally and internationally, that are making the electrification of agricultural machinery increasingly attractive. In addition to the elimination of harmful emissions, the cost aspect is particularly convincing: Electric agricultural machinery requires less maintenance and has lower operating costs. In agriculture, for example, it is often possible to produce extensive amounts of environmentally friendly solar power on the large roof areas available, which can be used directly to operate the farmer's own agricultural machinery. There is also the advantage of noise reduction. Also, many efficiency-enhancing, promising technological innovations, such as autonomous driving, can be integrated into electrified agricultural machinery. Accordingly, BMZ Group is seeing growing demand for its batteries from the agricultural sector and is presenting its advanced solutions to the entire international industry at AGRITECHNICA.

POWER2GO is a transportable energy storage system, which provides the necessary power wherever the stationary power network does not offer any connections or even fails. The POWER2GO will be launched in two variants. The POWER2GO LIFE is ideally suited to the needs of target groups such as campers and fans of various outdoor activities, while the POWER2GO WORK primarily addresses the needs of craftsmen.

Further information on the BMZ Group is available at www.bmz-group.com.

About BMZ Group:

BMZ Group is a global player in the development and production of cross-industry lithium-ion system solutions. It offers the complete value chain from the cell and the battery to second life and disposal. In addition to supplying markets such as medical, power- & gardentools as well as industrial applications, the BMZ Group sees itself primarily as THE GREEN ENERGY SYSTEM PROVIDER. With the production of home and industrial storage units for photovoltaic systems as well as batteries for electric mobility, BMZ manufactures the heart of the necessary infrastructure for the energy and transport turnaround. In view of the impending climate change and its consequences, the BMZ Group is thus fulfilling its social, economic and ecological responsibility. The Group is headquartered in Germany and has additional production facilities in China, Poland, the USA and North Macedonia, as well as subsidiaries in Japan, the UK and France. In addition, there are research and development sites worldwide. More than 2,500 employees work for the BMZ Group.
