

Batteryuniversity - Certification und Tests

IEC 62133-2:2017

CERTIFICATION TO INTERNATIONAL STANDARDS OF RECHARGEABLE CELLS AND PORTABLE BATTERIES

We provide assistance for international battery approval. Break through trade barriers and get certification under the IEC CB Scheme for your rechargeable cells and portable batteries according to the international safety standards IEC 62133. You will then receive a CB Certificate and a CB Report that you can use to apply for the respective national certification mark at every accredited CB Testing Laboratory worldwide. Obtaining

the necessary international certifications for market access can be difficult, time consuming and expensive. The CB Scheme was created by the IEC (International Electrotechnical Commission) to allow for faster and easier access to global markets. It is a process of mutual recognition of test results among participating countries, usually without the need for further product assessment.

International - enter markets faster worldwide with the CB Scheme

Participating countries	CB Scheme	Voluntary	Safety, EMC
Worldwide	UN Transportation Test UN 38.3	Mandatory	Safety
